

SoftTime Online 2.3.2 Release Notes

Modifications

- ***Custom Supervisor Dashboard*** - Now you can customize your dashboard with your choice of Widgets. The + Symbol selects Widgets you want displayed. Then, the ⚙ Settings Symbol selects your options. Have fun! Widgets will be automatically refreshed every 15 seconds. Your choices will be remembered. More Widgets coming soon ... submit your Widgets ideas to support@softwaretech.com
- An issue has been corrected with the Employee Recorded Time report that was causing the report to fail with very large employee/category datasets.
- The Company Audit report is now correctly sorted by event date.
- Absences can now be placed on an individual on their date of hire.
- Inactive (deleted) categories will no longer appear on the FYI and Employee FYI Report, unless there is active time recorded against the category in the time frame requested.
- An issue has been corrected that was preventing the upload of some company logo's.
- Optimizations made to our new servers to increase performance of the application across the board.
- Additional minor visual corrections and bug fixes.

SoftTime Online 2.3.2 will be released Monday, June 5th 2016 at 11:00 PM EST. We do not expect any downtime associated with this update to exceed 60 minutes.
